You are Invited to the
All Saints School
Neighborhood Walk Audit

Tuesday, March 6, 2018
1:00- 3:00 P.M.
All Saints School
1335 S. 10th St., Omaha, 68108

Live Well Omaha Kids is pleased to partner with All Saints School to implement Safe Routes to School, an evidenced-based program to encourage active transportation to and from school via four complimentary strategies- encouragement, education, engineering and enforcement. The benefits of increasing active transit are numerous and go beyond the individual whose health is improved by daily walking and biking. Additional benefits of Safe Routes to School include: improved traffic safety, better air quality, enhanced personal safety, long-term health care cost savings, increased neighborhood cohesion, and greater student academic achievement.

What is a Walk Audit?
A walk audit is a solution-focused, strengths based process of mapping assets and barriers to safe walking and bicycling by actually walking a typical route a child would take to school. Factors to be addressed might include: street lighting, sidewalk width and condition, traffic volume, presence of bicycle lanes, topography, and the presence of dogs, trash and debris. The walk audit is conducted by a diverse group of stakeholders who each bring a unique perspective to inform consensus solutions that will improve neighborhood walkability for all.

Schedule
Plan to walk outside for about 45 minutes- one hour. We will start the event with a brief training (indoors) on what to look for during the walk audit. Then, we will take a guided tour of the neighborhood with frequent stops. We will reconvene at the school around 2:00 p.m. to discuss our observations, prioritize challenges encountered, and agree on next steps.

What should you bring?
• Walking shoes
• Your expertise
• Good attitude
• Weather- appropriate clothing
• Camera/ phone- optional
• Note pad- optional

RSVP to Ashley Carroll at: Ashley@LiveWellOmaha.org or call 402-708-6860.
